3. UI Overview / UI-berblick / Vue d'ensemble

EN: Input & Anchors: load audio, markers, input AudioFX.
DE: Input & Anchors: Audio laden, Marker, AudioFX am Input.
FR: Input & Anchors : charger l'audio, marqueurs, AudioFX en entre.
EN: Description & Run: text description, chunking, model, device, Run/Abort.
DE: Description & Run: Text, Chunking, Modell, Device, Run/Abort.
FR: Description & Run : texte, chunking, modle, device, Run/Abort.
EN: Output: review target/residual, apply AudioFX, export.
DE: Output: Target/Residual prfen, AudioFX, Export.
FR: Output : vrifier target/residual, AudioFX, export.

Figure 3: Output tab (schematic)

4. Best-Practice Workflow / Best Practice / Flux recommand

EN: Use short test runs with small chunks to validate quality.
DE: Kurze Testlufe mit kleinen Chunks zur Qualittskontrolle.
FR: Lancer des tests courts avec petits chunks pour valider la qualit.
EN: Place markers at clear events (vocals, drums, speech).
DE: Marker an klaren Ereignissen setzen (Vocals, Drums, Sprache).
FR: Placer des marqueurs sur des vnements clairs (voix, drums, parole).
EN: Use anchors for repeating passages to improve consistency.
DE: Anchors fr wiederkehrende Passagen nutzen.
FR: Utiliser des anchors pour les passages rpts.

5. AudioFX Plugins / AudioFX-Plugins / Plugins AudioFX

EN: AudioFX load from 'plugins/' and are stored per stream (input/target/residual).

DE: AudioFX werden aus 'plugins/' geladen, pro Stream gespeichert.

FR: Les AudioFX se chargent depuis 'plugins/' et se mmorisent par flux.

6. Models & Offline / Modelle & Offline / Modles et hors-ligne

EN: Model list is pulled from facebook/sam-audio and marked (local/online).

DE: Modellliste kommt von facebook/sam-audio und ist (local/online) markiert.

FR: La liste vient de facebook/sam-audio et est marque (local/online).

EN: Offline uses a small fallback list.

DE: Offline wird eine kleine Fallback-Liste genutzt.

FR: Hors-ligne, une liste minimale est utilise.

7. Export & QA / Export & Qualitt / Export et contrle qualit

EN: Export target/residual WAV and check peaks/clipping.

DE: Target/Residual als WAV exportieren, Peaks/Clipping prfen.

FR: Exporter target/residual en WAV, vrifier les pics/clipping.

EN: Document model and chunk parameters for repeatability.

DE: Modell und Chunking-Parameter dokumentieren.

FR: Documenter le modle et les paramtres de chunking.

8. Troubleshooting / Fehlerbehebung / Dpannage

EN: No audio: select output device; test short WAV.

DE: Kein Audio: anderes Ausgabegerat whlen; kurze WAV testen.

FR: Pas d'audio : choisir un autre priphrique ; tester un WAV court.

EN: CUDA not used: set device to 'cuda' and verify drivers.

DE: CUDA nicht aktiv: Device auf 'cuda' stellen, Treiber prfen.

FR: CUDA inactif : device sur 'cuda', vrifier les pilotes.

Support

EN/DE/FR: See README.md and docs/ for details.
